MOLLE

EUROPEAN PATENT  
No. 002408252-0001

Direct Action® Dragon Egg® is 25-liter capacity backpack for either short patrol duties or EDC use. The pack features two hydration bladder pockets – one in the main compartment and additional in the zipped back part. The rear pocket, thanks to padded sleeve, can be used for safely carrying multiband radio devices or notebook (15"). Laser-cutted system compatible with MOLLE/PALS makes the backpack not only fully modular, but also still maintains low profile look. Thanks to the egg shape, the pack has smaller height and width than other packs with similar capacity and makes it more comfortable with belt kits or ballistic vests.
